TOOLS

- Programming Languages: Kotlin (Advanced), C, C++, JavaScript, HTML.
- Asynchronous and Reactive Programming: Flow, Coroutines.
- Frameworks and Libraries:
  User Interface: Jetpack Compose (Basic).
  Dependency Injection: Hilt.
  API Consumption: Retrofit.
  Monitoring and Analytics: Firebase (Crashlytics, Analytics).
- Version Control: Git & GitHub - Version control, collaboration, and workflow.
- Architecture and Best Practices:
  Architecture Patterns: MVVM, Clean Architecture.
  Best Practices: SOLID, Clean Code, Design Patterns.
- Other Tools: Docker (Basic, containers for development and deployment)

SKILLS

- Agile Learning
- Flexibility
- Resilience to Frustration
- Problem Solving
- Teamwork

LANGUAGES

- English – Intermediate

ANTONIO JESÚS RUIZ

MOBILE APPLICATION DEVELOPER

PROFESSIONAL SUMMARY

Android Developer with solid experience in Kotlin, MVVM architecture patterns, and SOLID principles, backed by hands-on projects applying best practices and modern technologies. With an interest in continuous integration tools and agile learning, I am motivated to contribute to dynamic teams and adapt to the technical needs of innovative projects, such as those in the banking sector.

WORK EXPERIENCE

Technology Manager
Colors Productos de Peluquería y Estética, S.L., Málaga (October 2024 - Present)

- Developed API-driven inventory management solutions, reducing stock discrepancies and improving fulfillment times.

- Optimized website performance and scalability using PHP, enhancing loading speed and user experience.

- Automated data synchronization between ERP and e-commerce platforms, improving operational efficiency.

FEATURED PROJECTS
ChitChat
Bootcamp Qualentum - VASS (2024)

- Developed a chat application for employees with authentication, push notifications, and API consumption.

- Implemented MVVM architecture, dependency injection with Hilt, and data access with Retrofit.

- Distributed and analyzed performance using Firebase (Crashlytics and Analytics).

EDUCATION

Mobile Application Development Bootcamp
Qualentum - VASS (2024)
Focused on advanced Kotlin, MVVM architecture, clean architecture, use of Flow and coroutines, and dependency injection.

42 Málaga
Fundación Telefónica (2022-2024)
Key competencies in programming, Docker, and complex problem-solving.

TS in Telecommunications and Computer Systems
IES Rosaleda, Málaga (2014 - 2016)
